

# Stay on your feet!

## Winter safety: plan ahead

### Stay warm

In cold temperatures, cover all exposed skin.

- Use a scarf to cover your mouth and nose.
- Wear a hat. About 40% of heat loss occurs through the head.
- Wear sunglasses or a visor to reduce glare from the sun and snow.
- Wear insulated gloves to keep your hands out of your pockets and to help you to stay balanced.
- Wear non-slip tread footwear—ice cleats may help prevent falls.

### Stay safe

Prepare your environment to stay safe.

- Have winter tools ready such as a shovel, ice scraper, salt, sand, non-clumping kitty litter, flashlight, walking aids, etc.
- Be aware of your surroundings and check for hazards on the ground (black ice is often not visible).
- Replace worn rubber tips on canes and walking poles. Consider using an ice pick attachment.
- Take small flat-footed steps on the ice and take your time—do not rush!
- Carry a list of emergency contacts and medical information with you.

### Stay active

Reduce your risk of injury and falls. More physical activity provides greater health benefits.

- Stay hydrated with warm fluids.
- Try urban pole walking on local pathways.
- Participate in virtual community activities.
